

PolarPlex™ Drop-Away Panel

Product Information Sheet

PolarPlex™ Drop-Away Panel

The PolarPlex™ Drop-Away Panel is a unique hot and cold aisle containment solution because it solves the "sprinkler head obstruction" problem associated with deploying containment. The panels are engineered to drop out of their frame in the event of a fire, UL-listed, and approved by most fire safety authorities. The insert's design also allows for light to pass through the panels which eliminates additional lighting requirements.

Lightweight, Clear and Flexible

Each 2' x 4' PolarPlex™ Drop-Away Panel weighs only 6.8 lbs, making them easy to handle and install. The panels are clear, which allows plenty of light to get into the aisles. Panels are constructed of anodized aluminum frames and specially engineered heat sensitive inserts.

Standard and Custom Sizes

4' aisle: 24" wide x 52" long

6' aisle: 24" wide x 76" long

Custom sizes available, up to 24" wide and 10' long.
