

PolarPlex™ Sliding Doors

Product Information Sheet

Sliding Doors Easily Attach to Racks

Sliding Doors Have No Bottom Track

Sliding Door with Auto-Close Top Track

Sliding Doors

Innovative sliding doors seal aisle ends as part of a containment solution. Doors attach to racks on the top with a special “adapt bracket” and are supported on the bottom with leveling feet plus can be further secured with a bottom bracket. Doors have a standard twinwall polycarbonate panels to let light through and edges are sealed with vertical and bottom brush seals. An Auto-Close option makes maintaining the containment integrity easy. Doors also have a “hold open” feature that makes it easier for moving carts in and out.
