

PlenaForm™ Baffle System

PlenaForm is a flexible, snap together, air flow baffle system which helps to solve dynamic thermal imbalances in data centers.

PlenaForm baffles are scored both vertically and horizontally so sections can be removed or added onto to meet any height or width requirement. All angles of bend radius may be attained, including inside and outside mounting to raised floor pedestals. Continuous punch out hole pattern allows attachment to any style raised floor pedestal at any height or width location with cable ties. PlenaForm baffles are die cut from a flame retardant polypropylene compound that is inert, non-conductive, and non-hygroscopic with a UL-VO 94 rating.

Part Number: BF12S2448

Includes: 12 PlenaForm Baffles, 88 cable ties and 44 rivets

Dimension: 24" h x 48" w x .040" d

Weight: Approximately 1.75 lbs. each

Total Shipping Weight per pack of 12 = ~25 lbs.
